

So, you have a project,
but NO developers?

**You take care of your business while
we focus on providing the best developers.**

Cost optimization

There couldn't be a more transparent option. You only pay for the hours the developer actually worked – we take care of all the rest. Also, the trial does not include a notice period, which means you can cancel the cooperation at any moment during this time.

Predictability

The selection of developers is a process consisting of a few steps ensuring you will always get a committed team with the people you need to make your vision a reality. It's a perfect match and – just as in life – the key to success in IT projects.

Availability

We always provide the right people at the right time. Our team consists of 100+ experienced developers backed by many successful projects, and if they have their hands full, our thorough and transparent recruitment process ensures an ideal replacement.

Location control

We keep the rules and flow characteristic of in-house teams even when working remotely. Our... we mean YOUR developers can also work from our office if they want to.

Quality

Trust in our expertise – 90% of our Clients extend the outsourcing period. The average length of our outsourcing contracts is 3 years, while some of the longest last twice that time.

Proactivity

We believe it is easier to talk with a human than with a machine. When cooperating with us, you always have your person on the other side, ensuring comfort of work and progress in projects.

how it works – long story short

STEP

1

We get to know you and your project!

We collect data, ask questions and determine the competences that you need for your project.

STEP

2

A perfect match!

We will present a list of reliable developers with whom we cooperate and who will fit your company and project in terms of profession, competences and organization.

ATTENTION – if we currently do not have the “perfect” candidates available, we can open recruitment and we will always keep you informed about the process.

how it works – long story short

STEP

3

Get to know each other!

You always get the chance to get to know our developers before you begin cooperating. You choose the people you would like to meet with.

STEP

4

It's worth to talk!

Nothing beats a conversation. We will arrange a video call with your new developers so that you will see for yourself whether it's a good match.

how it works – long story short

STEP

5

Yes or No?

So, you have found what you were looking for, and the developer you chose cannot wait to start working on your project? We quickly go through the formalities and we begin the trial period.

Was there no ideal candidate?

– We go back to point 2 and expand our recruitment efforts

STEP

6

Trial period.

We work normally, but you are the one to decide whether our style suits you. If not, you can always terminate the contract (immediately) paying only for the hours the developer had worked until that point.

@ web developers outsourcing

└ how it works – long story short

STEP

7

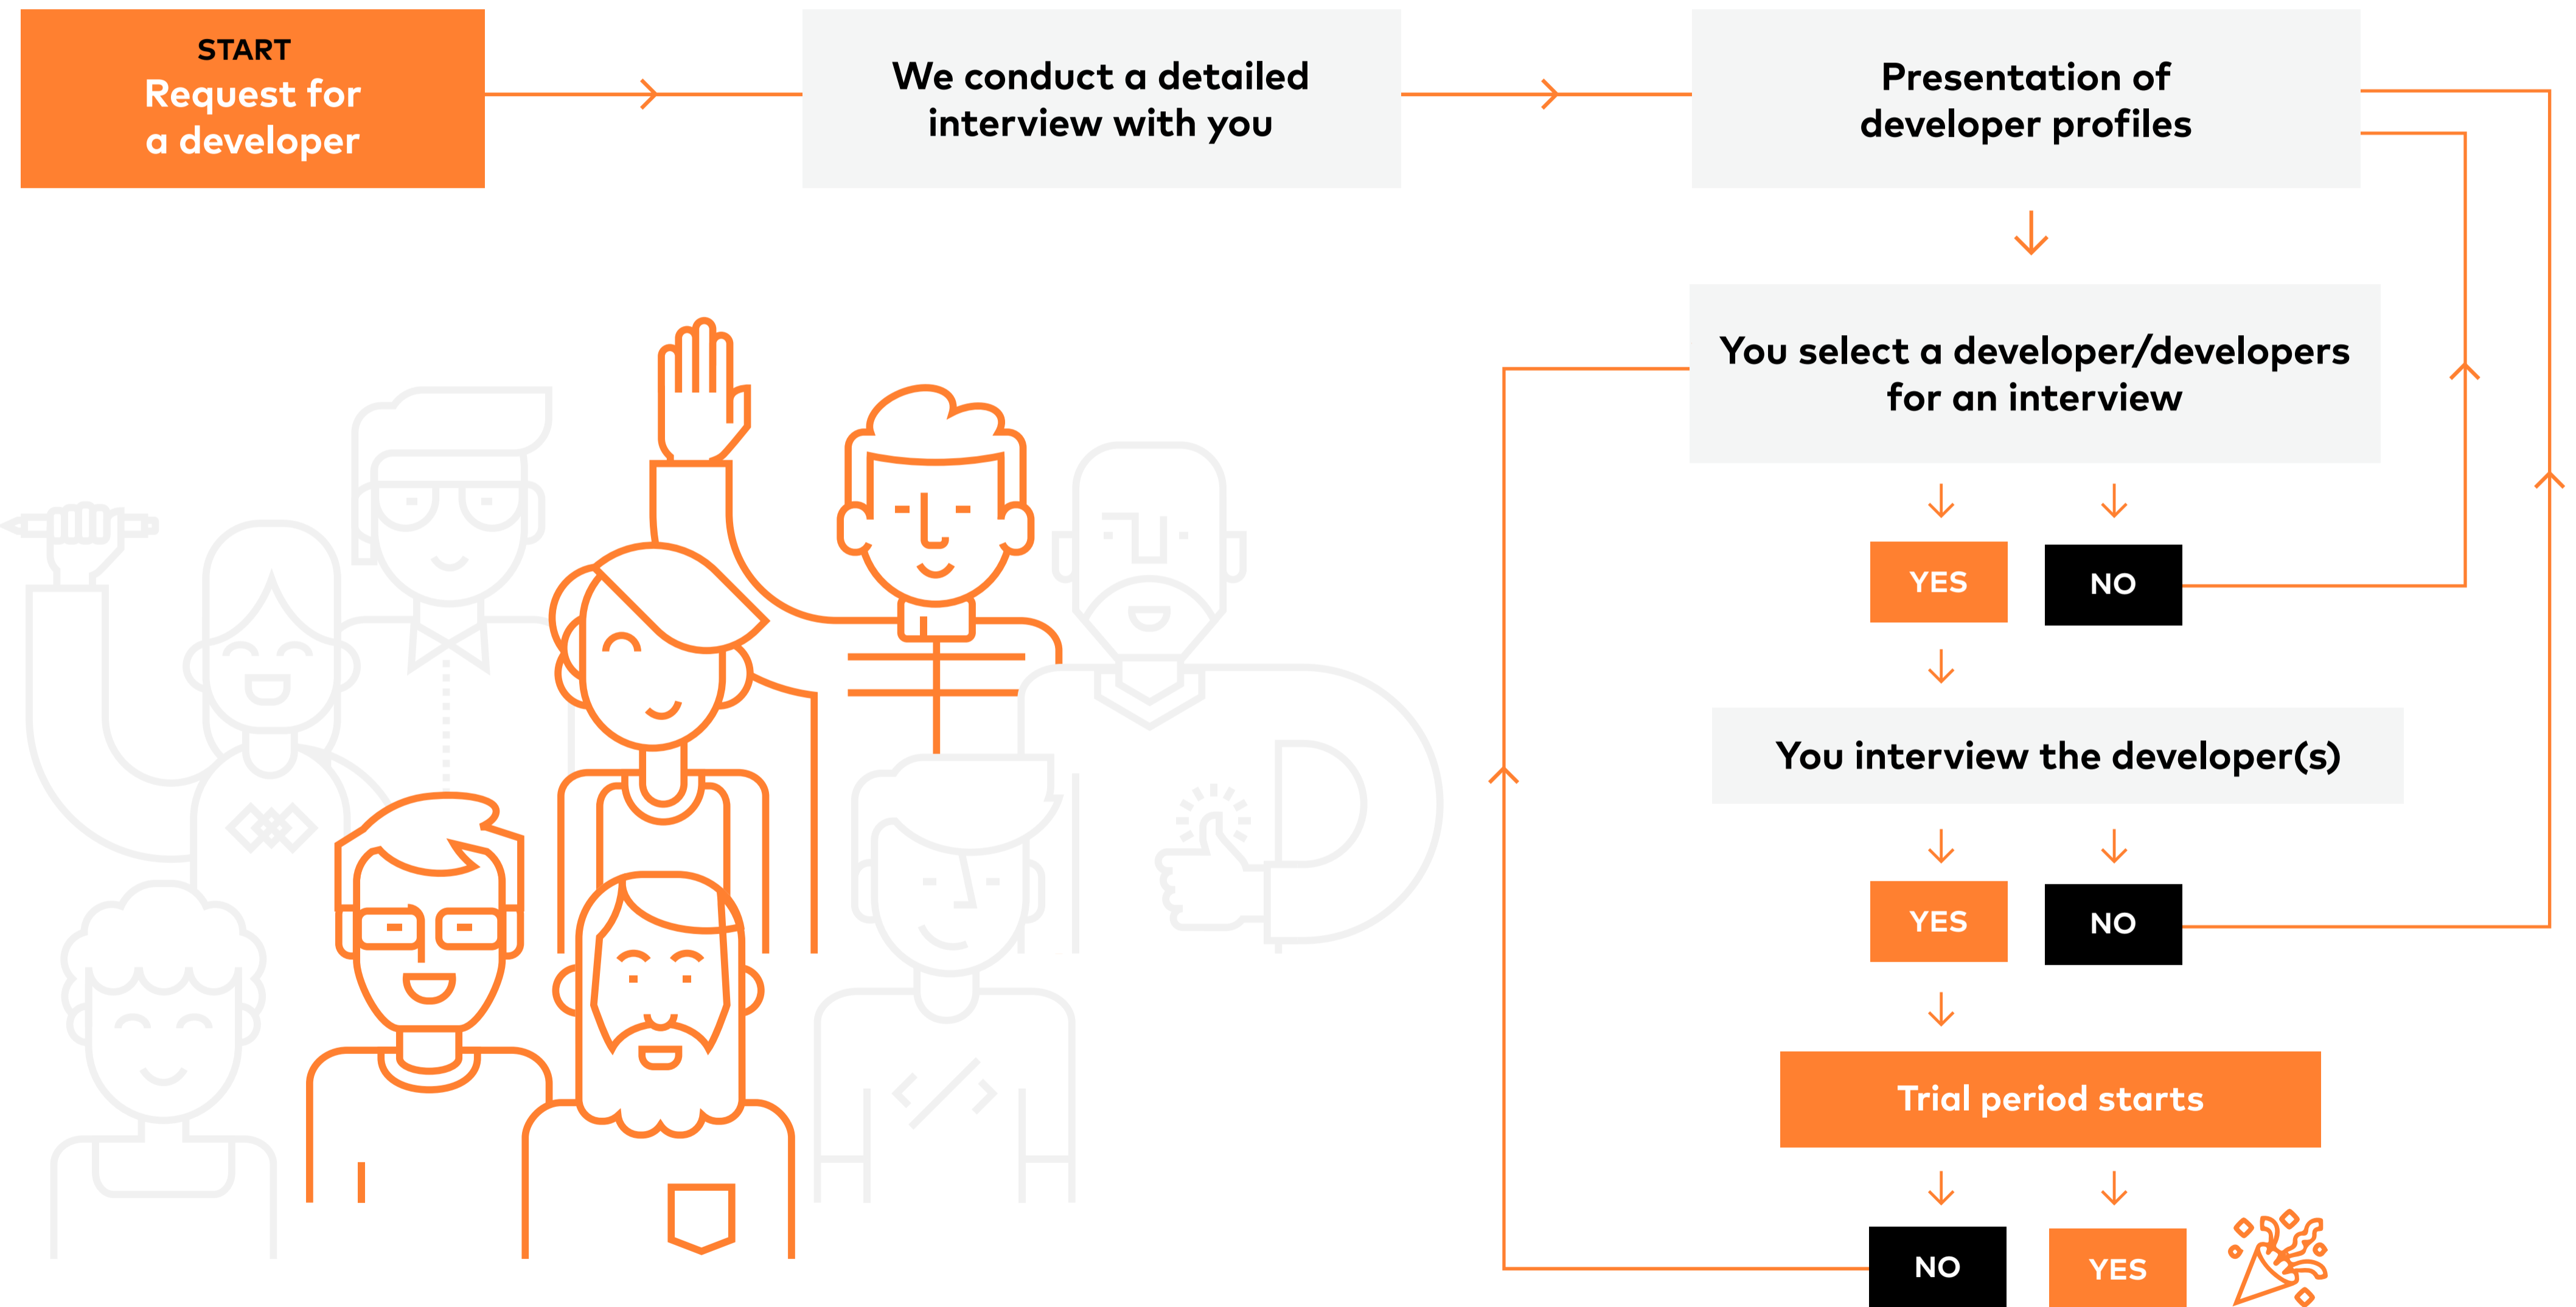

...and they lived happily ever after!

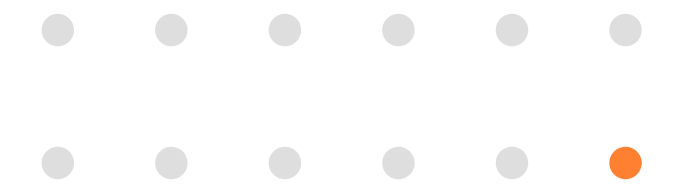

The trial is over, and so our story has a bright future.

how it works – formal path

...and they lived happily ever after!

More things we can help you with:

Projects

We have completed hundreds of projects. We can also handle yours.

All of these elements are implemented using technologies that best suit your needs:

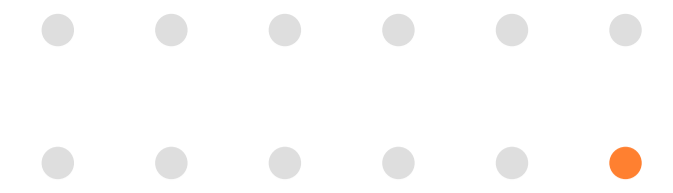

Digital Marketing

Even the best project will not bring you business without traffic. We will provide both of these things.

Incredible things in non-standard niches

You want to develop in non-obvious niches – we operate in gambling, eCommerce-OXID, esports, technical digital marketing and more.

**So, when would you like to have your
dedicated and committed team?**

Let's get to work on your
next project.
